EXPERIENCE

Independent Consultant – San Francisco, CA/ Houston, TX

July 2018 – Current

- Provided consulting services to blockchain startups on projects ranging from product prototyping and due diligence on investments to company business strategy
- Advised blockchain startups on fundraising and navigating the regulatory environment, and stress tested their token ecosystem and architecture

One Daijo, Ltd. – Co-Founder, Mountain View, CA

June 2017 – Oct 2018

One Daijo builds a global P2P microlending platform using blockchain and alternative credit scoring methods to provide affordable microloans to the borrowers and equip them with their own immutable digital credit identities.

- Led a team of 7 designers and developers on customer research, product design, and product development, resulting in the MVP built on the Stellar blockchain - <https://www.onedaijo.com/demo/>
- Authored One Daijo's [white paper](#), leading discussions on token model architecture, product design, and project roadmap
- Presented to Monetary Authority of Singapore (MAS) and the Ontario Securities Commission (OSC) and obtained a regulatory sandbox opportunity with the OSC
- Established partnership opportunities with Filipino payment companies, the World Bank, and the UNDP
- Obtained \$1M in funding, delivered pitches to investors from across the globe, and received an acquihire offer

Honey Science Corporation – Product Manager, Los Angeles, CA

July 2016 – June 2017

- Led the data analytics team to build internal tools to improve Honey's operational efficiency
- Revamped and set up a new data analytics process for the company, including streamlining of data cleansing and data collection from new sources
- Redesigned the architecture for coupon management and application algorithm

Bank of America Merrill Lynch – Power Investment Banking Analyst, New York

May 2015 – June 2016

- Prepared detailed valuation analyses and excel financial models for clients across the power sector
- Conducted industry research, performed due diligence, assisted in preparing client presentations for M&A and financings
- Deals: lead manager on \$260mm Black Hills Corporation equity units offering

Goldman Sachs – Quant Trader, New York, NY

June 2014 – May 2015

- Used Python and Pandas to perform quantitative analysis and to research, back test, and generate alpha
- Re-wrote legacy Perl functions and modules that access the team's database using Python on a Linux workstation
- Created an automated value investing trading strategy in cash equities that returned 15% from July to December

Chopper/DRW Trading – Junior Proprietary Trader, Chicago, IL

June 2013 – June 2014

- Managed risk for 10 traders during Asian and European markets, trading the treasury yield curve
- Reported directly to the CEO and monitored the firm's P&L risk and managed settlement of trades worth ~\$100mm/trade

PROJECTS

2.007 Design and Manufacturing – Student, Cambridge, MA

Feb 2011 – May 2011

- Designed robots using SolidWorks and manufactured the robots from scratch
- Used Arduino to code Robots' logics - one Robot was autonomous and the other was remote controlled
- Placed top 8 in International Design Competition

Co-authored "Energy Estimate for Designing Solar Panels in Israel" with Professor Faiman

May 2010 – Aug 2010
